## DRIVEWAY PERMIT APPLICATION

Local Law Number Two of 1988 requires that a driveway permit be obtained before any driveway may be constructed that enters into a highway in the Town of Easton, except in the Village of Greenwich. This law contains requirements about the construction and sighting distances for such a driveway. This form must be completed in full, and submitted with plans showing the location, widths, grades, and drainage for the proposed driveway. Construction or changes to an existing driveway without first obtaining a permit may result in legal action and fines.
